What are our future goals for teaching and learning?

We will take a whole-school approach to English, Maths, Science and (ICT) in line with the introduction of the Australian Curriculum. Whole school and individual Professional Development will be directed specifically to these areas with targeted funds towards our school Explicit Improvement Agenda (Reading 2012). Additional support will be given to those who are gifted and talented; those who have learning support or social and emotional well-being needs; and students with disabilities. Our curriculum offerings and design will reflect the intent of the Australian Curriculum in Literacy, Numeracy, Science and History and the Queensland Curriculum Assessment and Reporting Framework (QCARF) Essential Learnings, in HPE, SOSE, The Arts, LOTE and Technology.
